

What's New Unitrends Enterprise Backup™ and Recovery-Series Appliances

Backup, Archiving
& Disaster Recovery

Play IT Safe

Simply, quickly and reliably recover your IT Infrastructure—anytime, anywhere.

Recent enhancements to the award-winning Recovery-Series physical appliances and Unitrends Enterprise Backup virtual appliances to include:

Long-term Archiving

To disk, tape, and the cloud, Unitrends provides several methods to transfer data offsite for long term storage. Rotational and fixed archiving of tertiary backups is built-in and works alone and with replication. Parallel archiving enables multiple archive jobs to execute concurrently, increasing performance by 50-200%. And CloudHook provides a hassle-free approach that requires no additional equipment by seamlessly archiving backups to the cloud. Choose from Amazon S3, Google Cloud Storage and Rackspace Cloud Files, with more coming soon.

Group Management

Simplify control and management of virtual and physical machines. Easily create logical groups for fast navigation, simplified backup schedule assignment and self-service management.

Improved application performance (Exchange and SQL)

Significantly reduce backup windows, retention and replication bandwidth using the new Exchange incremental backup schedule with automatic log truncation. Additionally, you can speed up recovery of multiple Microsoft SQL Server databases through a single, easy to use setup process.

New Compliance and Service Provider Reports

In seconds, you can see how everything in your environment is protected for compliance purposes with the new Data Protection Policy Report. Additionally, providers and enterprises can easily track and enforce chargeback policies using the new Storage Footprint Report.

Performance Enhancements

- **Like things locked down?** Get up to 200% faster encrypted backup and replication with hardware-assisted encryption (requires appliance based on CentOS 6).
- **Want a vendor dedicated to shrinking RPOs?** Improve backup and replication windows by 25-50% through enhanced space management and bandwidth optimizations.
- **Need to manage and report faster in your large VMware environment?** VMware inventory scan performance has been improved by 10 times for large environments. Inventory scan performance is critical for to any growing VMware environment with multiple vCenters, hundreds of ESXi hosts and thousands of VMs.

“The Unitrends solution has been an absolute life saver.”

VMware Certified Application Recovery (V-CAR)

New integration between Unitrends physical and virtual appliances and ReliableDR lets you certify the recovery of applications within your vSphere backups. With the optional V-CAR feature add-on, ReliableDR orchestrates instant recovery on Unitrends appliances and allows for pushbutton failover when you need to recover applications, locally or across data centers. Industry leading DR governance, orchestration and automation is now enabled for Unitrends appliances to give you predictable application recovery plans.

Unitrends Bridge™

Transformation of physical Windows systems into virtual machines with this one-click physical to virtual (P2V) feature. Enables instant recovery and considerably drives down recovery time objectives (RTOs) for physical as well as virtual backups.

100% RTO advancement

Eliminating the need to restore bare metal and then file-based backup significantly reduces RTO for physical windows recovery. In addition, Unitrends has new physical and virtual GOS-level UEB Windows Instant Recovery (WIR) capabilities. The company remains the only industry vendor offering both GOS- and HOS-level instant recovery.

Cisco UCS (Unified Computing System) Bare Metal Backup—certified by Cisco

Drastically reduce the time it takes to recover Cisco UCS by upwards of 10 hours. Unitrends Enterprise Backup not only protects the physical and virtual machines running on the platform, but the configuration information as well.

50% to 200% acceleration in archiving

Expanding unmatched D2D2x archiving capabilities, Unitrends introduces a parallel configuration that enables multiple jobs to execute concurrently.

Industry-leading support of a wide range of data center assets

Our commitment to supporting your unique mix of assets continues with Oracle 12c support and enhanced Linux distribution support.

About Unitrends

Unitrends provides physical, virtual and cloud-based protection and recovery for every organization's most valuable assets: its data and applications. Supported by a "crazy-committed" customer service model based on engagement, experience and excellence, the company consistently achieves a 98 percent customer satisfaction rating and helps everyone play IT safe by delivering the best cost-to-value ratio available anywhere.
